EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Terryence Chapman on 02/02/2009.

The application has been amended as follows:

Claim 10 has been cancelled.

Rejections Withdrawn

The amendments to the claims filed 10/29/2008 overcome the previously issued 112 rejections by clarifying the molecular weight restrictions. Therefore, the rejections are withdrawn.

Claims Rejoined

Because the independent claim 16 is allowable, the claims 3 and 6-9 that contain all of the limitations of claim 16 are also allowable, and thus are rejoined in this application.

Response to Arguments

Applicant's arguments are persuasive at showing the distinctness of the amended claims over the prior art applied in the previous office action. The amendments change the claims to fully reflect the inventive brazing composition, and

Art Unit: 1793

applicant's arguments clarify the differences between the instantly claimed brazing composition and those taught by the previously applied prior art. Therefore, the previously issued grounds of art rejections are withdrawn.

Allowable Subject Matter

Claims 3, 6-9, and 16 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art of record, either alone or in combination, fails to anticipate or render obvious the instantly claimed brazing composition. Because the brazing composition is novel and non-obvious, claims 6-8 drawn to an aluminum material coated with said brazing composition and claim 9 drawn to a brazing method comprising said brazing composition are also patentably distinct over the prior art.

The most relevant prior art references found are Hasegawa et al (US 6234381) and Harakawa et al (US 6099968). The difference from instant claims is that the Hasegawa brazing composition does not comprise a (meth)acrylic acid/ (meth)acrylate copolymer emulsion that is at least 10 times greater in molecular weight than the binder component. The Harakawa composition differs because it does not contain a flux component. Thus, the prior art does not teach a brazing composition containing all of the components of the instant claims in the ranges claimed. For the above, reasons, the

Art Unit: 1793

subject matter of the amended instant claims is neither taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NOAH S. WIESE whose telephone number is (571)270-3596. The examiner can normally be reached on Monday-Friday, 7:30am-5:00pm EST.
